HOW

WHICH

- Course aims to familiarise surgeons with the best pre and intra operative practices for optimal visual outcomes and longterm stability with SFIOLs alongwith tips to negotiate complicated situations. The various methods of implantation in current practice are elaborated. With each technique, the typical learning curve and tips to climb it smoothly are dealt with. How to manage complex situations in an already compromised eye that might have been subject to previous trauma or extreme manoeuvres, with the right kind of preparation and finally the tools required to manage complications that may arise in the course of the procedure is dealt with in this course. The faculty consists of experienced surgeons of international repute with years of experience in this field

- Dr Swapna Nair Introduction
- Dr Amar Agarwal My Journey through Scleral Fixation of IOLs - adapting the procedure for a cataract surgeon
- Dr. Sandton JS Raj Glued SFIOL – Classic Method and Drawbacks
